

## Marking Machines

10 characters per second

With marking fields of 100 x 80 mm and 200 x 80 mm respectively, the XF510Sp and XF510Dp models enrich the **Technifor** range of pneumatic micro-

percussion marking machines. They can mark up to 10 characters per second, twice as many as the previous generations.

## Fanless Nanoserver

for mobile applications

The NanoServer E3-COM from **DSM** is an industrial computer that integrates a baseboard in mini

ITX format. It has two PCI buses, one MiniPCI bus, one gigabit Ethernet interface and four USB 2.0 ports. It has a solid industrial PC housing and contains a 2.5-inch hard disk with 80GB capacity.

## Frequency Inverters

integrated position control

The frequency inverters from **Getriebebau Nord** are available with integrated Posicon intelligent positioning. The position control provides a wide range of functions, is easy to operate and can

easily be parameterised without knowledge of complex programming languages.

## AC Drives

decrease energy consumption

The **Vacon 100** HVAC drives are tailored to the building automation industry and were designed to contribute to the

global reduction of CO2 emissions. Their basic daily functions are easily accessible via a modern graphical user interface. They comply with the requirements of the new harmonics standard IEC/EN 61000-3-12.
